

# Upcycle a Plastic Bottle

## You will need:

- A Plastic Bottle
- Washing Liquid
- Soil
- Water
- Scissors
- Cress Seeds

## Step 1

Cut the plastic bottle in half.

## Step 2

Use the bottom half of the bottle to make your plant pot. Add the soil to just below the top.

## Step 3

Add your cress seeds and spread them out across the soil. Then add a small amount of water and place in a sunny spot.

## Step 4

Now use the top half for the bubble blower.

## Step 5

Add the washing liquid to the water. Use about 2 ½ cups of water and ½ a cup of liquid. Mix together using the bubble blower. Blow gently to create some awesome bubbles!

**Bee Healthy tip:** Add a face using scrap paper to your plant pot.
